

One bite at a time!

**A directory of local food
producers 160 kilometers
around Yorkton**

2011

Brought to you by the Assiniboine Food Security Alliance

What is Food Security?

“Food security is a state of affairs where all people at all times have access to safe and nutritious food to maintain a healthy and active life.”
World Food Summit, 1996

Who is Assiniboine Food Secure Alliance?

*We are a community shared response for living well
with the gift of good food*

Assiniboine Food Secure Alliance is an organization of community-minded volunteers who are working towards increasing food security in Yorkton and surrounding region.

Our Mission is to provide practical, learning opportunities enabling people to access and consume food appropriate for a healthy life.

Projects under development include a community garden(s), seed festival and a regional food directory of producers.

The regional food directory is a community resource that will enable consumers to contact producers directly to purchase local food from those who produce it and wish to sell it locally.

We would like to thank...

- ✚ All our volunteers for this project
- ✚ All our producers
- ✚ Assiniboine Food Secure Alliance
- ✚ Sunrise Health Region
- ✚ Yorkton Toyota

More information contact Warren at (306) 782-3249
afsamatters@gmail.com

Get out there and enjoy 160 km of local food producers around Yorkton

There are several ways to access local produce this season 160 km around Yorkton:

- Farmers' markets
- Pre-picked market stands
- Farm direct
- U-Pick gardens

Farmers' Markets Purchase fresh food and local goods at any of the many farmers' markets around the province. Farmer's markets bring several producers together in one location to sell their goods directly to consumers. Each producer has a separate stall or stand at the market.

Pre-Picked Market Stands These are usually roadside stands on or near the property of the farmers. Farmers pick the produce for you and replenish the supplies with fresh produce daily. The advantage of going to roadside stands is that you can talk to the growers one-on-one about the way they farm and how to get the most out of their produce. Some stands specialize in a few particular varieties of produce, while others have a broader range, depending on the growing conditions of each farm or market garden.

Farm Direct Farmers may have produce, meat and other farm products available for direct purchase on-farm. Calling ahead might be a good idea to ensure there will be someone available when you plan to arrive.

U-Pick You can harvest local produce yourself by going to U-pick gardens. The growers will be on hand to answer any of your questions and picking your own produce is a way to spend the day with family or friends. Take time on the way home to visit a local community and have lunch.

Make the most of your visits to a local producer

Plan ahead – Make sure you know the hours of operation and ask about the produce selection before you get there.

Ask producers for information – Talk to the producer about their product and find out what you can about the produce. Some growers offer interesting and unusual types of produce.

Bring along this directory with you – This directory will provide you with details on driving distance, grower's contact information and description of the produce they sell & grow.

Go on an adventure – Visit parts of Saskatchewan you have never been to or rediscovering a community you haven't visited in some time. Check the local tourist office for ideas on what to see along the way.

Consider organic produce – Saskatchewan people are demanding organic produce. Be sure that the organic grower has an official federal certification. Check the growers' website or call ahead to ask.

We hope that you enjoy our directory and find it helpful in discovering locally-grown and produced food options for you and your family.

Please remember this directory is for information only, our suggested practice is one of buyer beware

SK

MB

“Man is the only creature that consumes without producing. He does not give milk, he does not lay eggs, he is too weak to pull the plough, and he cannot run fast enough to catch rabbits. Yet he is lord of all the animals.”

George Orwell

98 KM

The Garlic Garden

We offer large (up to 1/4 lb. per head) uniform bulbs fresh local grown garlic. Each bulb is grown in nutrient rich soil and is meticulously weeded for optimum growth.

We pride ourselves on NOT using any chemicals for weed control. Our fresh garlic is easy to peel and because the flavor is so strong, you only need a small amount compared to store bought.
